elevations in Items C2.a-h. the square footage of attached garage and the area of flood openings in square inches in Items A9.a-c, the square footage of crawlspace or enclosure(s) and the area of flood openings in square inches in Items A8.a-c, the features shown in the diagrams and select the diagram most applicable. Enter the diagram number in Item A7, The following diagrams illustrate various types of buildings. Compare the features of the building being certified with and the

is taken at the bottom of the lowest horizontal structural member (see drawing in instructions for Section C). In A zones, the floor elevation is taken at the top finished surface of the floor indicated; in V zones, the floor elevation

### DIAGRAM 1A

All slab-on-grade single- and multiple-floor buildings (other than split-level) and high-rise buildings, either detached or row type (e.g., townhouses); with or without attached garage.

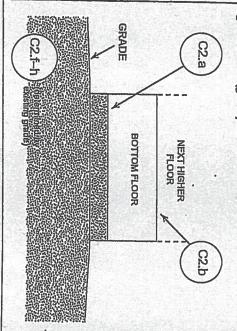

Distinguishing Feature – The bottom floor is at or above ground level (grade) on at least 1 side.\*

#### DIAGRAM 1B

All raised-slab-on-grade or slab-on-stem-wall-with-fill single- and multiple-floor buildings (other than split-level), either detached or row type (e.g., townhouses); with or without attached garage.

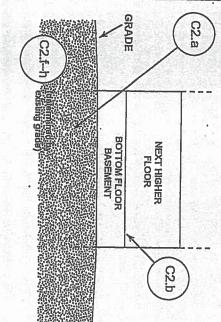

Distinguishing Feature - The bottom floor is at or above ground level (grade) on at least 1 side.\*

#### DIAGRAM 2A

All single- and multiple-floor buildings with basement (other than split-level) and high-rise buildings with basement, either detached or row type (e.g., townhouses); with or without attached garage.

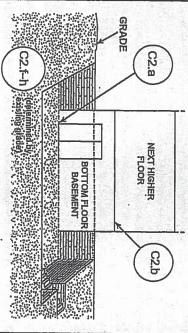

Distinguishing Feature — The bottom floor (basement or underground garage) is below ground level (grade) on all sides.\*

#### DIAGRAM 2B

All single- and multiple-floor buildings with basement (other than split-level) and high-rise buildings with basement, either detached or row type (e.g., townhouses); with or without attached garage.

Distinguishing Feature — The bottom floor (basement or underground garage) is below ground level (grade) on all sides; most of the height of the walls is below ground level on all sides; and the door and area of egress are also below ground level on all sides.\*

A floor that is below ground level (grade) on all sides is considered a basement even if the floor is used for living purposes, or as an office. garage, workshop, etc.
