raft foundati accordance	ons, piling, with the r	pile caps equirem	s, columns, g	rade beams and Florida Buildii	bracing) is el	r (with the except levated to or abov local floodplain	e the BFE in		

The pile or column foundation and building or structure attached thereto is designed in accordance with the <u>Florida Building Code</u> to be anchored to resist floatation, collapse, and lateral movement due to the effects of the wind and flood loads acting simultaneously on all building components, and other load requirements of the <u>Florida Building Code</u>. The potential for scour and erosion at the foundation has been anticipated for conditions associated with the base flood, including wave action.

## PLANNING AND DEVELOPMENT SERVICES

### SECTION 4 – Breakaway Wall Design Certification Statement

[NOTE: This section	ı must also l	be certi	ified by a	Florida l	license	d engineer	or arc	hitect	when	break	away n	ralls ex	cceed a
design safe loading	resistance	of 20 p	pounds per	square	foot.	This requi	rement	does	not a	pply t	o open	wood	/plastic
latticed/slats/louvers	or insect sc	reening	g.]										

☐ I certify: (1) I have developed or reviewed the structural design, plans, and specifications for construction and (2) the design and methods of construction to be used for the breakaway walls are in accordance with the <u>Florida Building Code</u>, <u>Building (ASCE 24)</u> or <u>Florida Building Code</u>, <u>Residential</u>, as applicable, and accepted standards of practice.

#### **SECTION 5- Certification and Seal**

[This certification is to be signed and sealed by a Florida licensed professional engineer or architect authorized by law to certify structural designs.]

By my signature and seal, I certify that the Zone V or Coastal A Zone, as applicable, Design Certification Statement in Section 3 and/or the Breakaway Wall Design Certification Statement in Section 4 (indicated by checkbox) are true and accurate.
